- Descriptions:

- **Standing Fan:** Our exquisitely crafted standing fan will enhance your space and give your place a retro feel. This fan has an antique appearance and is supported by a weighted base.
- With its oscillating fan head that tilts for directional air circulation, the three-speed floor fan allows you to regulate the airflow. The fan has a 3-speed setting and a voltage of 120 V, and it is very simple to use. The fan spins at 900, 1100, and 1280 revolutions per minute.
- **Adjustable Fan:** This standing fan may be adjusted for height and vertical angle to direct air upwards or downwards, depending on your preferences. The height of the room fan may be simply changed from 37 to 49 inches.
- Our fans may speed up air circulation and quickly cool the room in your house in style. They have a high-quality cast metal construction and a smooth brushed copper finish.
- **Portable Fans:** Our oscillating fans are quite portable and are easy to move from one room to another. Our fans are ideal for medium to big areas including bedrooms, study rooms, dorm rooms, workplaces, and garages because they take up very little floor space.
