Noise Level	28 dB

- **Descriptions:**

- Sleep Well: Advanced Sleep Mode dims the display lights and uses a temperature sensor to carefully change the fan speed to cater for different stages of sleep with noise levels as low as 28dB (whisper-quiet).
- Effortless cooling with a maximum fan speed of 25 feet per second thanks to a strong motor.
- 5 Fan Speeds & 4 Modes: With 5 fan speeds, Auto Mode (effortless control), Turbo Mode (fast cooling), Advanced Sleep Mode (nighttime rest), and Normal Fan Mode (manual control), you can choose your comfort.
- Remote control: You may change settings and cool off without getting up thanks to the tower fan's LED display, which makes information plainly apparent.
- Broad Coverage A larger coverage is provided by the optional 90° oscillation of the tower fan.
- Strong & Cleanable The
